

NEPA-PRO LLC

★ Veteran Owned & Operated · NEPA Region

Sales Script — Electrical Contractors

V1.0 · FOR PA-REGION RESIDENTIAL & COMMERCIAL ELECTRICIANS

Why this market

\$30%+

federal tax credit (up to \$1,000) on EV charger installs through 2032

\$3K–\$15K

typical residential service-panel upgrade — financing visibility moves the needle

Electricians have two booming sub-markets that most contractor websites barely surface: **EV charger installs** (every new EV owner needs one and Googles for help) and **panel upgrades** driven by heat pumps, EV adoption, and aging service. The pitch focuses on capturing those high-intent searches.

Industry signal: federal Inflation Reduction Act tax credits cover 30% of EV charger installation cost (up to \$1,000) through 2032, plus utility-specific rebates. Most contractor sites don't mention any of this — easy value-add to surface.

1. Pre-call research

- ☐ Google "electrician [their city] PA" — where do they rank?
- ☐ Their site (if any) — does it mention EV chargers? Panel upgrades? 24/7 emergency service?
- ☐ License visible? PA requires HICPA registration for residential — is theirs prominent?

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is **[your first name]** from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a website platform specifically for electricians in PA, and most contractors I talk to are losing the EV charger and panel-upgrade work to bigger guys with better-positioned websites. Quick question — does your current site even mention EV charger installs?"

3. Discovery

1. "How many EV charger installs are you doing per month, and where do those leads come from?"
2. "Service panel upgrades — are most of those tied to a specific reason (EV, heat pump, kitchen remodel) or just aging service?"
3. "When somebody Googles 'emergency electrician [your city]' at 11 PM, are they finding you?"

4. Value pitch — electrician-specific

1. **EV charger landing page** — separate dedicated page that ranks for "Tesla charger installation [city]," shows pricing tiers, surfaces the 30% federal tax credit and PA utility rebates.
2. **Panel upgrade calculator** — homeowner enters their existing amperage and what they want to add; the page shows them whether they need an upgrade. Self-qualifies the lead.
3. **24/7 emergency form** — captures storm-damage and electrical-hazard calls when you can't pick up. Texts and emails you instantly.
4. **License + bond + insurance display** — front and center. PA homeowners are wary; visible credentials close the trust gap.
5. **Service-area pages** — local SEO for every town you serve. "Electrician Clarks Summit," "Panel upgrade Scranton."
6. **Commercial vs. residential split** — separate pathways so commercial property managers don't navigate residential pages and vice versa.

5. Pricing & CTA

YOU

"Best thing is for me to share my screen for 15 minutes — I'll have mockups for [their company] specifically with your service area, your license, and the EV/rebate positioning. Tuesday or Thursday this week?"

6. Electrician-specific objections

THEY SAY	YOU SAY
"I get most of my work from GCs / referrals."	"Best channel. We don't replace it — we make sure when those referrals Google you, what they find closes the deal. Half of referred customers shop you online before they call."
"EV chargers — too much warranty hassle."	"Hear that. We position you as Tesla / ChargePoint / EnergyStar certified (whatever you actually are) so the customer's expectations match what you install. Warranty issues drop when they understand who they hired."
"My phone never stops, I don't need leads."	"Then this isn't lead-gen. It's a quality-of-life pitch — the form pre-qualifies before you call back, so you spend less time on calls that go nowhere."
"Electrical isn't really an online-search business."	"It used to not be. EV charger installs change that — anyone with a new Tesla searches. Same with panel upgrades for heat pumps. The market shifted in the last 3 years."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
