Sales Script — Nail Salons

V1.0 · FOR PA-REGION NAIL SALONS

Why this market

~75%

of consumers research a salon online before booking, per industry surveys

~30%

typical reduction in no-shows when 24-hour reminder texts are enabled

Nail salon margins live and die on chair utilization and no-shows. Most independent shops in PA still book by phone — which means missed bookings during business hours, no off-hours capture, and zero automated reminders. The pitch is straightforward: 24/7 booking + automated reminders + a portfolio that closes new clients on first visit.

1. Pre-call research

- ☐ Find them on Instagram — most salons live there. Are photos current? Lots of followers?
- ☐ Check Google Business Profile — is "Book online" enabled? Hours up to date?
- ☐ Try to book an appointment from your phone — does it work? How many taps?

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is [your first name] from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a booking and customer platform specifically for nail salons in PA, and I noticed [salon name] doesn't have 24-hour online booking yet. Got 30 seconds for me to explain why that matters?"

3. Discovery

1. "How are most appointments booked today — phone, walk-in, Instagram DM, or online?"
2. "What's the no-show rate look like in a typical week?" *If they say "couple a week" → that's \$200–\$600/week in lost revenue. Math it later in the pitch.*
3. "When somebody books at 10 PM on a Sunday because they want their nails done before Monday morning — does that booking happen, or do they book at the salon down the street?"

4. Value pitch — nail-specific

1. **24/7 online booking** — calendar synced to your existing schedule, so customers can book any time. Half the bookings come outside business hours.
2. **Automated SMS reminders** — 24-hour and 2-hour reminders cut no-shows roughly in half across the industry. Real money back per chair.
3. **Photo portfolio that converts** — every set you finish, the customer can view your work right from the booking app. Loyalty, retention, and new-client closing all rise.
4. **Customer text marketing** — slow Tuesday at 1 PM? Send a flash discount to your last 100 clients. Two or three of them will rebook by the end of the day.
5. **Loyalty program** — 10th set free, birthday discounts, friend-referral credit. Owned by you, not Mindbody or Booksy.

5. Pricing & CTA

YOU "Here's what I'd love to do — give me 10 minutes on Zoom and I'll show you mockups built for [salon name] specifically. If it's not a fit, no harm done. Tuesday or Thursday this week, mornings or afternoons?"

6. Nail-specific objections

THEY SAY	YOU SAY
"My customers just text me on Instagram."	"That works — but it means you're checking DMs while you're trying to do nails. We pull all of that into one calendar so you don't have to context-switch all day."
"I use Booksy / Mindbody / Vagaro."	"Cool, those are good. The piece they don't do — or charge a lot extra for — is the website that doubles as a customer-facing app. Most owners on those platforms still don't have a real site."
"I don't want to deal with another login."	"Hear that. Setup is on us; you log in twice — once to see your calendar, once to see your customer list. After that it's invisible."
"My techs handle their own books."	"Got it — we can set up booking per tech with their own page, photos, and calendar. They keep their flow, you get the salon-level reporting."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
