★ Veteran Owned & Operated · NEPA Region

Sales Script — Barbershops

V1.0 · FOR PA-REGION BARBERSHOPS

Why this market

Barbershops are walk-in heavy and cash-heavy, with strong brand loyalty per barber. The two pain points are **queue / wait-time visibility** and **capturing repeat customers' contact info**. The pitch leans into both.

~2/3

of male grooming customers research online before their first visit, per industry surveys

\$25–\$45

average cut + tip — high-frequency repeat business is the model

1. Pre-call research

- ☐ Google Business Profile — photos? Hours? Reviews recent?
- ☐ Search "barbershop near [city]" — where do they rank?
- ☐ Walk-in friendly or appointment-only? Different pitch for each.

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is [your first name] from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a platform that lets barbershops show their wait time live, take appointments, and remember regulars without you having to ask their name twice. Got 30 seconds?"

3. Discovery

1. "Walk-in shop, appointment-only, or both?"
2. "How do regulars know if you're busy on a Saturday — they just show up and hope?"
3. "Do you have a way to text your customers, or is everybody just hoping their next cut shows up?"

4. Value pitch — barber-specific

1. **Live queue display** — customers see "20 min wait" on the website / app before they leave the house. Cuts dead-time grumbling and walk-aways.
2. **Take-a-number system** — they tap "Get in line," you see them on the queue, they get a text when it's almost their turn.
3. **Customer database** — every customer who books or queues hands you their contact info. After 6 months you have a reachable list of regulars.
4. **SMS marketing** — slow Tuesday at 11? Push out a \$5-off cut for the next two hours. Phones ping in pockets across town.
5. **Loyalty** — 10th cut free, build a referral system that rewards the regulars who bring their friends.

5. Pricing & CTA

YOU "I'd love to show you what this would look like for [shop name]. Quick 10-minute screenshare. Better for you mornings before you open, or afternoons in your slow window?"

6. Barber-specific objections

THEY SAY	YOU SAY
"All my regulars know when to come in."	"Sure, the regulars do. The piece you're missing is the new guy who almost walked in but saw 6 chairs full through the window and went somewhere else. The queue display is for him."
"I run cash — I don't want a computer in the way."	"Got it. The system runs on a tablet you mount on the counter or your phone. Nothing changes about how you take payment. Customers self-checkin; you keep cutting."
"My barbers don't want to be tracked."	"That's not what this is. Each barber gets their own page and queue. They don't lose autonomy, they gain a way for first-time customers to specifically ask for them."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
