Sales Script — CNC & Precision Machine Shops

V1.0 · FOR PA-REGION CNC SHOPS & PRECISION MANUFACTURERS

Why this market

CNC shops are pure B2B — buyers are mechanical engineers, procurement officers, and product designers searching for vendors who can hold tolerances on specific materials. They aren't shopping on price first; they're shopping on **capability + reliability + ISO certification**. Most shop websites haven't been updated since 2015 and miss the buyers who'd otherwise be ideal accounts.

ISO 9001

often required for aerospace/medical/defense work — must be visible

3-axis / 5-axis

capability differentiation — lock in the searches that match your shop

1. Pre-call research

- ☐ Their site — capabilities listed? Equipment? Certifications?
- ☐ Industries served — automotive, aerospace, medical, food-grade, general?
- ☐ Prototype-to-production, or production-only?
- ☐ ITAR / ISO / AS9100 — verify what they actually have.

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is **[your first name]** from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a website platform specifically for CNC and precision machine shops. Quick question: when a procurement officer at an aerospace OEM is searching for a 5-axis shop with AS9100, does your site come up?"

3. Discovery

1. "What industries are your bread-and-butter — aerospace, medical, automotive, defense, general?"
2. "Capabilities — 3-axis, 4-axis, 5-axis? Mill, lathe, swiss?"
3. "Certifications — ISO 9001, AS9100, ITAR?"

4. Value pitch — CNC-specific

- 1. **Capabilities matrix** — equipment, axes, work envelopes, tolerance ranges, materials. Procurement scans it and decides whether to send the RFQ.
- 2. **Certifications wall** — ISO 9001, AS9100D, ITAR-registered, etc. Logos and certificate numbers. Buyer compliance starts here.
- 3. **Industry case studies** — anonymized projects: aerospace bracket from 6061-T6, medical device housing from 17-4 stainless, etc. Shows the buyer you've solved their problem before.
- 4. **RFQ portal** — secure file upload for STEP / DWG / PDF. Procurement uploads the print + quantity + due date, you reply with a quote. Removes the email back-and-forth.
- 5. **Equipment list with brand & year** — Haas / Mazak / Doosan / Okuma. Buyers specifically search for shops that run their preferred equipment.
- 6. **Lead-time transparency** — "Currently quoting at 4-week lead time, expedite available." Sets expectations, builds trust.

5. Pricing & CTA

YOU

"Best thing is for me to share my screen for 15 minutes — I'll have a capability matrix and RFQ portal template built for [their shop] specifically. Tuesday or Thursday this week?"

CNC sales cycles are longer. First conversation books a discovery; discovery books a proposal; proposal might take 30–60 days to close because procurement is involved. Patience and follow-up rhythm matter more than urgency.

6. CNC-specific objections

THEY SAY	YOU SAY
"All my work is repeat customers."	"Best position to be in. The site does two things — captures the new lead occasionally, and shows your existing customers' procurement teams that you're modern. Many old-school shops lose accounts when procurement decides their vendor 'looks dated.'"
"Procurement uses ThomasNet / MFG / industry directories."	"Right. And those listings link to your site. If your site looks like 2010, the click bounces. We make sure the click converts."
"My business is too technical for a website to capture."	"Your business is exactly the kind of thing a website should capture — engineers love specs, equipment lists, tolerance data. They want to read all of it before they call."
"I've tried RFQ portals, customers don't use them."	"Old portals, yeah. Modern ones with drag-and-drop, instant confirmation, and clear status — different story. Worth seeing what we'd build."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
