Sales Script — Deck Builders

V1.0 · FOR PA-REGION CUSTOM DECK CONTRACTORS

Why this market

Deck building is seasonal (April–October), high-ticket (\$8K–\$60K), and visually-driven. Homeowners spend weeks researching before contacting any contractor. Most deck builder websites are weak — generic stock photos, no calculator, no financing visibility — even though the customer is doing exactly the kind of intent-rich research where a great site converts cold visitors.

\$8K–\$60K

typical deck build — material choice drives the spread

3–6 wk

research-to-decision timeline — your site has time to win them over

1. Pre-call research

- ☐ Their site — do they have photos of completed decks? By material? By size?
- ☐ Composite vs. wood — what do they specialize in?
- ☐ TimberTech / Trex / Azek dealer? Major selling point most don't surface.

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is **[your first name]** from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a website platform specifically for custom deck builders in PA. Quick question: when somebody is researching a \$20,000 composite deck for 6 weeks before calling you, what does your website show them?"

3. Discovery

1. "What's your typical project size and material — wood, composite, mix?"
2. "How are leads coming in today — referrals, BBB, manufacturer dealer locator, your site?"
3. "Do you offer financing on bigger builds, and if so, do customers know before they call?"

4. Value pitch — deck-builder-specific

- 1. **Filterable project gallery** — by material, by size, by feature (lighting, multi-level, screened-in, pergola). Homeowners filter to what they want to see.
- 2. **Deck cost calculator** — square footage, material, features. Spits out an estimated range. Pre-qualifies and educates simultaneously.
- 3. **Material comparison tool** — wood vs. composite vs. PVC, with cost-per-year-of-life math. Closes the higher-ticket sale because the customer understands the value.
- 4. **Financing front-and-center** — "\$0 down, payments from \$X/mo on a \$20K deck." Massive lever for closing decisions where the customer was on the fence about scope.
- 5. **Permit & HOA assistance** — page that explains your role in pulling permits and dealing with HOAs. Differentiates from solo contractors.
- 6. **Build timeline transparency** — "Booked through July, taking deposits for August builds." Sets expectations and creates urgency.

5. Pricing & CTA

YOU

"Best thing is for me to share my screen for 15 minutes — I'll have a portfolio + calculator template built for [their company] specifically. Tuesday or Wednesday this week?"

6. Deck-builder-specific objections

THEY SAY	YOU SAY
"I'm booked through next year."	"That's fantastic. Then this isn't about more leads — it's about better ones. The calculator filters tire-kickers; you only spend time on customers who already know what they want and can afford it."
"Customers always negotiate price down."	"That's almost always because they're comparing apples to oranges — your \$30K composite vs. someone else's \$18K wood. The material comparison page makes them understand what they're actually buying. Negotiation drops."
"My TimberTech / Trex dealer locator brings me leads."	"Keep it. Dealer locator drives traffic; your own site converts it. Right now those leads are landing on a generic page. We make them land on your portfolio."
"It's seasonal — slow in winter."	"Right, which is exactly when winter pre-booking pages earn their keep. We build off-season into the system — locking in spring builds with deposits in January."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
