Sales Script — Painters

V1.0 · FOR PA-REGION RESIDENTIAL & COMMERCIAL PAINTERS

Why this market

Painting is a visual trade — homeowners decide on a painter primarily by looking at photos of past work. Most painter websites either (a) don't exist or (b) have generic stock photos that hurt more than help. The pitch is straightforward: **portfolio + instant estimate forms** close more jobs at higher ticket prices.

\$3K–\$10K

typical interior repaint — visual trust closes the deal

~70%

of painting customers compare 3+ contractors before deciding

1. Pre-call research

- ☐ Their site or Google Business Profile — are there photos of actual completed jobs?
- ☐ Reviews — most painters have great reviews but no system to surface them
- ☐ Interior, exterior, commercial, or all? Different pitch per focus.

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is **[your first name]** from **NEPA-PRO** — we're a veteran-owned shop in Clarks Summit. I'm calling because we built a website platform specifically for painters in PA, and the #1 reason painters lose bids is the homeowner can't see their work online. Quick question: do you have a portfolio of finished jobs anywhere customers can browse before they call?"

3. Discovery

1. "What's your job mix — interior, exterior, cabinets, commercial?"
2. "When you finish a job, do you take photos? What happens to them?" *Almost always: "On my phone." That's gold sitting unused.*
3. "How are estimates handled — phone walkthroughs, in-person, or send-me-photos?"

4. Value pitch — painter-specific

1. **Filterable photo portfolio** — interior / exterior / cabinets / specialty. Homeowners filter to "kitchen cabinet refinishing" and see 30 examples. Closes the trust gap instantly.
2. **Before/after slider** — drag to compare. The single most powerful conversion tool in the trade.
3. **Photo-estimate form** — homeowner uploads 4 photos + room dimensions, you reply with a ballpark. Pre-qualifies leads that turn into real walkthroughs.
4. **Color consultation booking** — separate page for upsell service. Most painters offer it; few advertise it.
5. **License + insurance + worker's comp display** — visible credentials, especially important for interior work where homeowners worry about damage.
6. **Review aggregation + automated review requests** — text goes out 24 hours after job completion.

5. Pricing & CTA

YOU

"Best thing is for me to share my screen for 10 minutes — I'll have a portfolio template built for [their company] using whatever sample photos you've got. Tuesday or Wednesday?"

6. Painter-specific objections

THEY SAY	YOU SAY
"My photos aren't good enough."	"Hear that all the time. iPhone photos are fine — we'll guide what to capture. Most homeowners aren't comparing photo quality, they're looking for proof you've done their type of project."
"I don't have a website right now and word-of-mouth keeps me busy."	"Best channel. Site doesn't replace it — it converts referrals. Your friend says 'use Bob the painter' and they Google you. If nothing comes up, the trust drops in half."
"Painting isn't really shopped online."	"It is now. Homeowners look at photos before color consult before they call. We make sure your photos are what they're looking at."
"I do mostly commercial — different business."	"Got it. Commercial painters need a different page set — property managers, insurance work, multi-unit. We can build that path separately. Different leads, different pitch."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
