★ Veteran Owned & Operated · NEPA Region

Sales Script — Roofers

V1.0 · FOR PA-REGION RESIDENTIAL ROOFING CONTRACTORS

Why this market

~80%

of homeowners research a roofer online before calling

\$50–\$100+

cost per lead from Angi / HomeAdvisor / Networx — and the lead is shared with 3–4 competitors

Roofing is a high-ticket, trust-driven trade. Most independent roofers in PA pay heavily for shared leads from third parties and have weak (or no) websites of their own. The pitch is two-fold: **(1)** own your lead generation instead of renting it, and **(2)** close more of the leads you do get with a credibility-first website that includes before/after galleries, reviews, and instant estimate forms.

1. Pre-call research

- ☐ Google "roofer in [their city]" — do they show up? Where? Any reviews?
- ☐ Their website if any — does it load? Mobile-friendly? Have photos of actual jobs?
- ☐ Are they on HomeAdvisor / Angi / Networx? (They almost certainly are.)

2. Opening

Required identification (TCPA): the first thing out of your mouth on every call must be your name, that you are calling from NEPA-PRO LLC, and the purpose of the call. Failure to identify violates federal law.

YOU

"Hi, this is **[your first name]** from **NEPA-PRO** — we're a veteran-owned construction company in Clarks Summit. I'm calling because we built a website and app platform specifically for roofers, and most contractors I talk to are paying \$50 or more per lead to Angi or HomeAdvisor for leads that get shared with three other companies. Quick question — does that sound like your situation?"

3. Discovery

1. "What percentage of your leads come from third-party platforms vs. your own website or referrals?"
2. "When a homeowner finds you online, what's the next step they take — call you, fill out a form, or just disappear?"
3. "Do you offer financing, and if so, do customers know about it before they call you?" *Financing visibility increases close rate substantially in roofing — many contractors offer it but never advertise it.*

4. Value pitch — roofer-specific

1. **Lead-capture website that ranks** — local SEO so you show up in "roofer in [city]" searches. Your leads, exclusive to you, free after build.
2. **Before/after gallery** — drag-and-drop from your phone after every job. Trust is the #1 factor in winning roofing bids; pictures are how you win it.
3. **Instant estimate form** — homeowner fills out roof age, square footage, photos. You get a qualified lead with the data you need to quote, before you even pick up the phone.
4. **Financing front-and-center** — if you offer it, surface it. "\$0 down, payments from \$X/mo" doubles inbound on most contractors who turn it on.
5. **Review collection automated** — every completed job triggers a review request. Most roofers have 5 reviews and 50 happy customers. We close that gap.
6. **Storm-response landing pages** — when a hailstorm comes through your service area, we push a tailored page. Insurance-claim assistance, free inspection — captures the surge.

5. Pricing & CTA

YOU "Best thing I can do is show you mockups for [their company]. Give me 15 minutes on Zoom — I'll have your branding, your service area, your competitors' positioning all ready. Tuesday or Wednesday this week?"

Roofers are higher-ticket prospects. **Allocate 15 minutes** for the discovery call instead of 10. Bring a one-page proposal — they expect it.

6. Roofer-specific objections

THEY SAY	YOU SAY
"Angi works fine for me."	"Most contractors I talk to feel that way until they realize what they're spending. Quick math: how many leads a month, average price per lead, and your close rate? Let's see what that's costing per closed job — usually it's eye-opening."
"Word-of-mouth is my main channel."	"Best channel there is — and we don't replace it, we amplify it. When a happy customer mentions you, the next person Googles you. If your site is bad or doesn't exist, that referral leaks. We plug the leak."
"I have a website my nephew built."	"Love that. Quick favor — pull it up on your phone right now. Tell me how long it takes to load. Bet it's longer than 4 seconds. That's where the homeowner bounces."
"Roofing is seasonal — slow in winter."	"Right, which is exactly when winter storm-response and inspection-booking pages earn their keep. We build the off-season into the system, not against it."
"I don't need more leads, I need better ones."	"Same thing. Lead quality comes from your site doing the qualifying upfront — square footage, roof age, photos. By the time they hit submit, they're a real prospect, not a shopper."

7. After the call

- ☐ If booked → calendar invite within 5 minutes, mark **Qualified**
- ☐ If LVM → use the Voicemail Script doc, mark **LVM**, send Email Follow-up
- ☐ If "not interested" → polite exit, mark **Lost**
- ☐ If "remove me" → mark **Do Not Call** immediately, no follow-up

For pricing, "send me an email," and other generic pushback, see the **Objection Handling Library**.
